

CAB WRAP (Communications, Arts, and Business Academy Wells Fargo Advisors Rewarding Academic Progress) began in 2008 with the main goals of rewarding the academic progress of 4th and 5th graders and teaching high school students how to run a business.

Today, CAB WRAP meets its goals through frequent visits to Hackler Intermediate School and weekly business meetings at the high school, creating exciting and original ways to keep intermediate level students interested in school while working inside a business model.

WRAP's latest project was the Hackler Healthy Kids 5K, in which high school students and community partners designed and implemented a presentation to teach 3rd—5th graders about living an active, healthy lifestyle, culminating in a 5K to raise money for the Reppell Diabetes Learning Center. CAB WRAP continues to be a vital and engaging part of both CAB Academy and Mountain Home High School.
